SUBJECT INDEX

METALS & ALLOYS

VOLUME III—JANUARY 1932 TO DECEMBER 1932

Aircraft, Aluminum Alloys in.—G. O. Hoglund. 178
Alumino-Silicate Refractories.—G. A. Bole. 15
Aluminum, Preparation for the Market.—J. B. Nealey. 166
——in Motor Vehicle Construction.—Frank Jardine. 173
——Alloys in the U. S. S. Akron.—G. O. Hoglund. 178
Annealing Furnaces, Economies in.—H. Hines. 113
Arc Welding, Metallurgy of some Variables in.—F. R. Hensel & E. I. Larsen. 250
Arsenic in Ternary Lead Base Bearing Alloys.—K. H. Wegner. 116
Austenitic Steels for Corrosion Resistance.—James A. Parsons, Jr. & Earl Ryder. 56
—— ——plus Boron, Hardening of.—R. Wasmuht. 105

Babbitt, Copper-Tin Compound in.—George A. Nelson. 168
Bearing Alloys, Arsenic in Ternary Lead Base.—K. H. Wegner. 116
—— ——, White Metal.—Leland E. Grant. 138, 152
Bonding Magnesite Linings for Steel Melting Furnaces without Use of Iron Oxide.—Louis Jordan. 22
Boron-Iron Alloys, their Hardening.—R. Wasmuht. 105
Brinell Testing using Sintered Tungsten Carbide Balls. Haakon Styri. 273

Cadmium Plating vs. Corrosion-fatigue; Pickling vs. Corrosion-fatigue.—Wilber E. Harvey. 69
Cambria Iron Company, Historical Sketch of.—L. W. Spring & L. E. Gilmore. 93
Carbon Steel, Structure of Heat Treated Low.—Welton J. Crook & Edmund C. Babson. 183
Carburizing, Continuous Gas, in Practice. — E. A. Thomas. 84
Case Hardening in Practice.—E. A. Thomas. 84
Cast Iron, Improved Method of Polishing Metallographic Specimens of.—J. R. Vilella. 205
Castings, Electric Steel for.—Henry D. Phillips. 214
——, Reclaiming Leaky.—W. M. Corse. 255
Chromium Plating Electric Irons. — Clarence L. Van Derau. 264
Copper and its Alloys, Resistance to Repeated Stress. —H. W. Gillett. 200, 236, 257, 275
——, Rapid Development of Patina on.—John R. Freeman, Jr. & P. H. Kirby. 190
——Tin Compound in Babbitt.—George A. Nelson. 168
——Tin-Lead System, Constitution of. (Cor. abs.) —B. Blumenthal. 181
Corrosion Rate of Zinc, Effect of pH on, in oxygenated Aqueous Solutions.—B. E. Roetheli, G. L. Cox & W. B. Littreal. 73
——Resistant Metal, Everdur. C. B. Jacobs, Jr. 26
—— —— ——, New Rustless Iron Alloy.—R. P. DeVries. 49
—— —— ——, Austenitic Steels for Severe Corrosion Resistance.—James A. Parsons, Jr. & Earl Ryder. 56
Corrosion-fatigue, Cadmium plating vs.; Pickling vs.—Wilber E. Harvey. 69

Design and Construction of Propellers for Miss America X.—E. R. Darby. 246
Ductility, Percent Elongation in the Tensile Test as a Method of Measuring.—Reid L. Kenyon. 220
Duralumin, Hardness Change of, with Time and at Different Depths.—Franz Bollenrath. 120

Early Chemistry and Chemists in the Iron and Steel Industries of America.—L. W. Spring & L. E. Gilmore. 40, 93
Effect of Controlled Cooling and Temperature Equalization on Internal Fissures in Rails.—C.P., O.F.A. & N. P. P. Sandberg. 89
—— ——Crystal Size on Physical Properties of Tin-base Babbitts.—Ernest B. Drake. 77
—— ——pH on Corrosion Products and Corrosion Rate of Zinc in Oxygenated Aqueous Solutions.—B. E. Roetheli, G. L. Cox & W. B. Littreal. 73
Electric Steel for Castings.—Henry D. Phillips. 214
Electroplating Electric Irons.—Clarence L. Van Derau. 264
Elinvar, Invar and Related Iron-Nickel Alloys.—J. W. Sands. 131, 159
Everdur Metal—A High Strength, Corrosion Resistant Engineering Material.—C. B. Jacobs, Jr. 26

Fatigue of Copper.—H. W. Gillett. 200, 236, 257, 275
—— ——Brass.—H. W. Gillett. 257
—— ——Bronze.—H. W. Gillett. 275
—— ——Metals, A Backward Glance.—H. F. Moore. 195
—— —— ——, Importance to Engineering Design.—T. A. Solberg & H. E. Haven. 196
—— ——Nickel-Brass.—H. W. Gillett. 257
—— ——Special Non-Ferrous Alloys.—H. W. Gillett. 275
Finishing of Electric Irons.—Clarence L. Van Derau. 264
Furnace Atmospheres, Heat Treating.—Sam Tour. 270
Furnaces, Economies in Bright Annealing.—H. Hines. 113

Gamma-Alpha Transformation in Wrought Iron.—R. H. Heyer. 226
Gold Electrodes for the Spectrograph, Preparation of Purified.—Thomas A. Wright. 146

Hardening Iron-Boron Alloys and 18-8 Steels plus Boron.—R. Wasmuht. 105
Hardness Change of Duralumin with Time and at Different Depths.—Franz Bollenrath. 120
——Tester, Rockwell Superficial.—V. E. Lysaght. 185
——Testing with Sintered Tungsten Carbide Brinell Balls.—Haakon Styri. 273
Heat Treated Low Carbon Steel, Structure of.—Welton J. Crook & Edmund C. Babson. 183
Heat Treatment of Ball-Bearing Races, Recent Progress. —Haakon Styri. 38
Heat Treating Furnace Atmospheres.—Sam Tour. 270
Historical.—
Cambria Iron Company, the First Steel Chemist and Beginnings of Bessemer Steel. — L. W. Spring. 93
Early Chemistry and Chemists in the Iron & Steel Industries of America.—L. W. Spring & L. E. Gilmore. 40, 93
Early Experiments with X-Rays.—Albert Sauveur. 82

Internal Fissures, Effect of Controlled Cooling and Temperature Equalization on, in Rails.—C.P., O.F.A. & N. P. Sandberg. 89
Invar, Elinvar and Related Iron-Nickel Alloys.—J. W. Sands. 131, 159
Iron-Beryllium System.—R. H. Harrington. 43
Iron-Boron Alloys and 18-8 Steels plus Boron. Their Hardening and Precipitation-Hardening.—R. Wasmuht. 105
Iron-Nickel Alloys, Invar, Elinvar and Related.—J. W. Sands. 131, 159
Iron-nitride, Relation to Plastic Flow and to the Fry Etch.—H. W. Gillett (Ext. abs.) 127
Izett Steel, What It Is and What It Is Used For.—G. C. Neuendorff. 61

Lamellar Pearlite, Formation of.—R. G. Guthrie & J. A. Comstock. 234
Lead Base Bearing Alloys, Arsenic in Ternary.—K. H. Wegner. 116
Lead-Tin-Copper System, Constitution of. (Cor. abs.) —B. Blumenthal. 181
Light Alloys in Motor Vehicle Construction.—Frank Jardine. 173

Magnesite Linings for Steel Melting Furnaces, Bonding.—Louis Jordan. 22
Metallurgy of Some Variables in Arc Welding.—F. R. Hensel & E. I. Larsen. 250
Molybdenum Today and Tomorrow.—J. L. Gregg & H. W. Gillett. 98
Motor Vehicles, Light Alloys in the Construction of.—Frank Jardine. 173

Nickel-Iron Alloys, Invar, Elinvar and Related.—J. W. Sands. 131, 159
Nickel Plating Electric Irons.—Clarence L. Van Derau. 264
Nitriding Plant and Technique.—H. H. Ashdown. 210

Open-Hearth Steel, Residual Metals in.—Clyde E. Williams & John D. Sullivan. 240

Patina on Copper, Rapid Development of.—John R. Freeman, Jr. & P. H. Kirby. 190.
Pearlite, Formation of Lamellar.—R. G. Guthrie & J. A. Comstock. 234
Pickling vs. Corrosion-fatigue.—Wilber E. Harvey. 69
Plastic Flow, Relation of Iron Nitride to, and to the Fry Etch.—H. W. Gillett. (ext. abs.) 127
Plating, Cadmium, vs. Corrosion-fatigue; Pickling vs. Corrosion-fatigue.—Wilber E. Harvey. 69
Precipitation Hardening of Iron-Boron Alloys and 18-8 Steels plus Boron.—R. Wasmuht. 105
—— —— and Formation of Lamellar Pearlite.—R. G. Guthrie & J. A. Comstock. 234
—— —— and Hardness Change of Duralumin with Time and at Different Depths.—Franz Bollenrath. 120
—— ——, Steel in the Light of the Theory of.—Albert Sauveur. 177
—— ——, Theory of, in Steel.—Roy M. Allen. 233
Precipitation Theory of Steel Hardness.—Roy M. Allen. 233
Polishing Metallographic Specimens of Cast Iron, Improved Method of.—J. R. Vilella. 205
Press Casting, Its Relation to Die Casting and Permanent Mold Casting.—Charles Pack. 29
Propellers, Design and Construction of, for Miss America X.—E. R. Darby. 246

Rails, Effect of Controlled Cooling and Temperature Equalization on Internal Fissures in.—C.P., O.F.A. & N. P. Sandberg. 89
Reclaiming Leaky Castings.—W. M. Corse. 255
Refractories, Alumino-Silicate.—G. A. Bole. 15
——, Bonding Magnesite, for Steel Melting Furnaces without use of Iron Oxide.—Louis Jordan. 22
——in Metallurgical Operations.—Clyde E. Williams. 3
——, Silicon Carbide, Application in Metallurgy.—H. R. Houchins & C. McMullen. 12
Residual Metals in Open-Hearth Steel.—Clyde E. Williams & John D. Sullivan. 240
Rockwell Superficial Hardness Tester.—V. E. Lysaght. 185
Rustless Iron Alloy, New.—R. P. DeVries. 49

Sheets, Percent Elongation in the Tensile Test as a Method of Measuring the Ductility of.—Reid L. Kenyon. 220
Silicon, Some Properties of Pure.—R. L. Templin. 136
Silicon Carbide and Its Application in Metallurgy.—H. R. Houchins & C. McMullen. 12
Sintered Tungsten Carbide Brinell Balls.—Haakon Styri. 273
Spectrographic Analysis, Preparation of Purified Gold Electrodes for.—Thomas A. Wright. 146
Steel in the Light of the Precipitation Theory.—Albert Sauveur. 177
——, Structure of Heat Treated Low Carbon.—Welton J. Crook & Edmund C. Babson. 183
Systems—
Copper-Tin-Lead.—B. Blumenthal (Cor. abs.) 181
Iron-Beryllium.—R. H. Harrington. 43
Lead-Tin-Copper.—B. Blumenthal (Cor. abs.) 181
Tin-Lead-Copper.—B. Blumenthal (Cor. abs.) 181

Temperature Equalization, Effect of, on Internal Fissures in Rails.—C.P., O.F.A. & N. P. Sandberg. 89
Tensile Test, Percent Elongation in, as a Method of Measuring the Ductility of Thin Sheets.—Reid L. Kenyon. 220
Tin-base Babbitts, Effect of Crystal Size on Physical Properties of.—Ernest B. Drake. 77
Tin-Copper Compound in Babbitt.—George A. Nelson. 168
Tin-Lead-Copper System, Constitution of. (Cor. abs.) B. Blumenthal. 181
Tungsten Carbide Brinell Balls, Sintered.—Haakon Styri. 273

Wrought Iron, Gamma-Alpha Transformation in.—R. H. Heyer. 226

X-Rays, Early Experiments with.—Albert Sauveur. 82

Zinc Corrosion Rate, Effect of pH on, in oxygenated Aqueous Solutions.—B. E. Roetheli, G. L. Cox & W. B. Littreal. 73

AUTHOR INDEX
METALS & ALLOYS
VOLUME III—JANUARY 1932 TO DECEMBER 1932

Allen, Roy M.—The Precipitation Theory of Steel Hardness. 233

Ashdown, H. H.—Nitriding Plant and Technique. 210

Babson, Edmund C. & Crook, Welton J.—Structure of Heat Treated Low Carbon Steel. 183

Blumenthal, B.—The Constitution of the Copper-Tin-Lead System. (cor. abs.) 181

Bole, G. A.—The Alumino-Silicate Refractories. 15

Bollenrath, Franz.—Hardness Change of Duralumin with Time and at Different Depths. 120

Comstock, J. A. & Guthrie, R. G.—On The Formation of Lamellar Pearlite. 234

Corse, W. M.—Reclaiming Leaky Castings. 255

Cox, G. L., Littreal, W. B. & Roethell, B. E.—Effect of pH on the Corrosion Products and Corrosion Rate of Zinc in Oxygenated Aqueous Solutions. 73

Crook, Welton J. & Babson, Edmund C.—Structure of Heat Treated Low Carbon Steel. 183

Darby, E. R.—Design and Construction of Propellers for Miss America X. 246

DeVries, R. P.—New Rustless Iron Alloy. 49

Drake, Ernest B.—Effect of Crystal Size on Physical Properties of Tin-base Babbitts. 77

Freeman, John R., Jr. & Kirby, P. H.—The Rapid Development of Patina on Copper. 190

Gillett, H. W.—Relation of Iron-nitride to Plastic Flow and to the Fry Etch. (ext. abs.) 127

——Resistance of Copper and Its Alloys to Repeated Stress.

Part 1. Tough-Pitch Copper, Annealed and Cold-Worked. 200

Part 2. Effect of Impurities in and Additions to Copper, Lack of Satisfactory Accelerated Test Methods. 236

Part 3. The Brasses and Nickel-Brasses. 257

Part 4. The Bronzes and Special Alloys. 275

——**& Gregg, J. L.**—Molybdenum—Today and Tomorrow. 98

Gilmore, L. E. & Spring, L. W.—Early Chemistry and Chemists in the Iron and Steel Industries of America. 40, 93

Grant, Leland E.—White Metal Bearing Alloys. 138, 152

Gregg, J. L. & Gillett, H. W.—Molybdenum—Today and Tomorrow. 98

Guthrie, R. G. & Comstock, J. A.—On The Formation of Lamellar Pearlite. 234

Harrington, R. H.—The Iron-Beryllium System. 43

Harvey, Wilber E.—Cadmium Plating vs. Corrosion-fatigue; Pickling vs. Corrosion-fatigue. 69

Haven, H. E. & Solberg, T. A.—Importance of Fatigue of Metals to Engineering Design. 196

Hensel, F. R. & Larsen, E. I.—Metallurgy of Some Variables in Arc Welding. 250

Heyer, R. H.—Gamma-Alpha Transformation in Wrought Iron. 226

Hines, H.—Bright Annealing Furnace Economies. 113

Hoglund, G. O.—Aluminum Alloys in the U. S. S. Akron. 178

Houchins, H. R. & McMullen, C.—Silicon Carbide and its Application in Metallurgy. 12

Jacobs, C. B., Jr.—Everdur Metal—A High Strength, Corrosion Resistant Engineering Material. 26

Jardine, Frank.—Light Alloys in Motor Vehicle Construction. 173

Jordan, Louis—Bonding Magnesite Linings for Steel Melting Furnaces without Use of Iron Oxide. 22

Kenyon, Reid L.—Percent Elongation in the Tensile Test as a Method of Measuring the Ductility of Thin Sheets. 220

Kirby, P. H. & Freeman, John R., Jr.—The Rapid Development of Patina on Copper. 190

Larsen, E. I. & Hensel, F. R.—Metallurgy of Some Variables in Arc Welding. 250

Littreal, W. B., Cox, G. L. & Roethell, B. E.—Effect of pH on the Corrosion Products and Corrosion Rate of Zinc in Oxygenated Aqueous Solutions. 73

Lysaght, V. E.—The Rockwell Superficial Hardness Tester. 185.

McMullen, C. & Houchins, H. R.—Silicon Carbide and its Application in Metallurgy. 12
